

一元二次方程式(佔分 20 分)

問題描述：

求一元二次方程式 $ax^2 + bx + c = 0$ 的根

輸入說明：

每組輸入共一行，內含三個整數 a, b, c 以空白隔開。

輸出說明：

Two different roots $x1=??, x2=??$

Two same roots $x=??$

No real root

(答案均為整數時，若有兩個根則大者在前)

範例 1：

輸入：

1 3 -10

輸出：

Two different roots $x1=2, x2=-5$

範例 2：

輸入：

1 0 0

輸出：

Two same roots $x=0$

範例 3：

輸入：

1 1 1

輸出：

No real root

Quadratic Equation (20 Points)

Problem Description:

Find the roots of the quadratic equation $ax^2 + bx + c = 0$.

Input Description:

Each input set consists of one line, containing three integers a, b, and c separated by spaces.

Output Description:

Two different roots $x_1=??$, $x_2=??$

Two same roots $x=??$

No real root

(If the answers are integers and there are two roots, the larger one comes first.)

Example 1:

Input:

1 3 -10

Output:

Two different roots $x_1=2$, $x_2=-5$

Example 2:

Input: 1 0 0

Output:

Two same roots $x=0$

Example 3:

Input:

1 1 1

Output:

No real root
